BRF4

4' strip conversion kit. It has been designed to convert existing 4 foot strip fixtures to T8 from T12 lighting. Its flexibility is ideally suited for existing fixtures that require improved energy-efficiency and performance.

FEATURES

- Universal style brackets
- 3 Sizes available: 3/4, 4/5, and 5/6 inches
 - 3/4 kit will cover a 3 to 4 inch wide existing fixture
 - 4/5 kit will cover a 4 to 5 inch wide existing fixture
 - 5/6 kit will cover a 5 to 6 inch wide existing fixture
- Pre-painted white steel ballast covers available
- Reflectors available in pre-painted high-reflectance white steel, white aluminum or specular aluminum
- Available with 1, 2, and 3 lamp cross sections
 - 2 lamp min. of 3" wide
 - 3 lamp min. of 4" wide

APPLICATIONS

- Existing fluorescent strip and industrial fixtures

APPROVALS

- CSA approved for Canada and USA

OPTICS

Conversion kit converts existing fixtures to 4' T8 lighting, increasing performance and reducing energy consumption.

MOUNTING

The kit has been designed to be retrofitted into existing fluorescent strip fixtures using self-tapping screws.

CONSTRUCTION

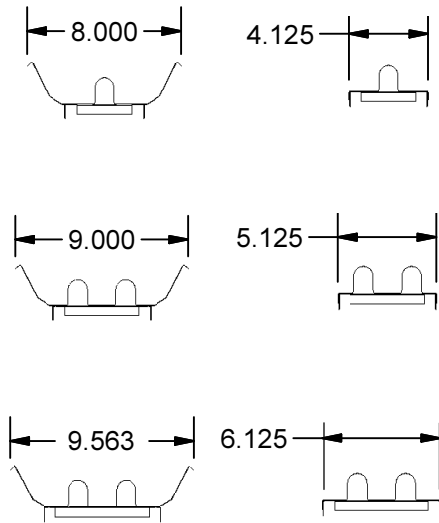

Universal brackets, reflectors, and ballast covers are available in a variety of widths to retrofit any sized fixture. This kit is available to convert existing strip or industrial fixtures to T8 lighting.
