## COUPLING INSTRUCTIONS

### FOLLOW CORRECT WIRING DIAGRAMS AND FLOOR LAYOUTS

- \* If total amount of fixtures in run is equal to 2, then there is no middle fixture.
  - If total amount of fixtures is greater than 3, then number of middle fixture is equal to (TOTAL - 2).
  - Example: If total is 5, then number of middle fixtures is equal to  $5 - 2 = 3$ .
1. Start by connecting all electrical wires/connectors accordingly.
  2. Run the side of the coupling brackets on the next unit's edge above the flange; the unit are offset about 1/4".
  3. When the two enclosures come together move the unit with the coupling brackets up to hook the cut-out in the bracket on the stud on the other unit.
  4. When the units are "HOOKED" put in screws to tighten the units together.
  5. Make sure that the units are balanced and lined up properly from the hanging wires. Any misalignment will create an improper assembly.

## WALL MOUNT INSTALLATION

1. Mark the wall using the wall mount brackets (distance indicated below, can be with 1/2").
2. Mount wall brackets (hardware not supplied).
3. Hook fixture onto wall brackets.
4. Secure using #8 - 32 screw provided.
