

BHVR6PL VERTICAL FLUORESCENT HOUSING

6 INCH VERTICAL FLUORESCENT HOUSING

6"

6 INCH VERTICAL FLUORESCENT HOUSING

TRIM: 6101 REFLECTOR

DESCRIPTION:

1. LAMP HOLDER - Die-cast aluminum lamp holder effectively provides heat dissipation and ventilation. Unitized optics guarantees proper trim to housing installation. Tool-less installation adjustability from either outside the housing or inside the housing.

2. MOUNTING BRACKET - Preinstalled bar hangers allow housing to be positioned and locked at any point within a 24" joist span and can be shortened for 12" joists. They are designed to be hammered directly without using nails or screws and could be fit onto T-Bar spline for easy installation and quick alignment.

3. RETAINING SPRINGS - Precision tooled springs secure trim to mounting frame, for effortless and tool-less installation.

4. JUNCTION BOX/BALLAST - UL listed for through-branch circuit wiring and has four 1/2" KO's, one 3/4" KO and four Romex knockouts with pry-out slots and strain clamps. Ballast and Junction Box are accessible from below, no tools required. **Ballast supplied is manufactured by Advance Transformer CO, Universal Technologies or Lutron Electronics.**

5. MOUNTING FRAME - Die-formed construction for maximum heat dissipation and rust protection.

OPTICS:

6. REFLECTOR - .050" aluminum reflector with low iridescent anodized finish. Reflector provides 45-degree lamp-to-reflector image cutoff.

7. GROOVE BAFFLE - Self-flanged one-piece aluminum with concentric rings.

8. LENS - Choice of either tempered clear, tempered fresnel, tempered prismatic or tempered frosted lens fastened with two torsion springs for easy re-lamping. UL listed for wet or damp location.
