# Super-Brite Flexilight

5/8" DIAMETER

The Super-Brite rope light, 5/8" in diameter, is made with super-bright bulbs (6V/100MA). Each bulb emits 66.7% higher brightness than the standard miniature bulb. Since we only use the highest-quality PVC material along with UV additives, the Super-Brite Flexilight can be used in indoor or outdoor applications and can withstand both freezing and scorching weather.

Superior brightness makes these rope lights perfect for creating highlights in decorations. Due to its larger bulbs and thickness, Super-Brite is also designed for large-scale decorations, such as those on a skyscraper, across a bridge, or on a large billboard.

Number of wire	2
