

Enerlites®

1-GANG TOGGLE, MID-SIZE EMERGENCY WALL PLATE

MODEL NO: 7711M-E

DESCRIPTION

The ENERLITES 7711M-E 1-gang toggle emergency wall plate is a specialized wall plate designed for emergency situations. It is specifically crafted to accommodate a single toggle switch. The design of the 1-gang toggle emergency wall plate is often standardized, allowing for easy identification in emergency situations. Bright, eye-catching colors or universally recognized symbols are used to quickly locate and operate the emergency switch.

FEATURES

- Made of 430 stainless steel
- Provides extended life in extreme and corrosive environments
- Smooth finish without recessed lines for easy cleaning and to maintain attractive appearance
