

Enerlites®

AIR CIRCULATOR TIMER WALL SWITCH

MODEL NO: DWTS

DESCRIPTION

The ENERLITES DWTS is an automated timer wall switch for an air-circulating fan. The fresh air fan control offers both a countdown timer and a minutes per hour (MPH) timer. The countdown timer can be set anywhere from 5-60 minutes and activates when the fan is manually turned ON. The MPH timer recognizes when the fan was last used and automates it for a pre-selected amount of time after each hour that it is OFF. Automating the fresh air fan hourly helps to expel stale air and maintain good indoor air quality. The device also includes a manual ON/OFF switch for the air circulating fan.

FEATURES

- Turns fan ON/OFF automatically based on preset timer
- Manual ON / Automatic OFF for fan
- Automatic minute per hour is up to 60 minutes
- Time delay for fan is up to 60 minutes
- Can be manually controlled for immediate ventilation needs
- Interchangeable face cover
- Neutral Wire Required

SPECIFICATIONS

Voltage	120VAC, 60 Hz
Maximum Fan Load	1/4 HP, 3Amp
Fan Time Delay	5-60 Minutes
Fan Auto Mode	10-60 Minutes
Warranty	2 Years

TESTING & CODE COMPLIANCE

APPLICATIONS

- Bathrooms
