## easy light, no wiring

anti-theft installation

SL-SWL-15W

motion sensor and photocell

adjust solar panel angle to maximize sunlight & allow snow to slide off

3 operating modes that are programmable via remote control or on fixture

- 7W and 15W models available in 4000K
- All-in-one design, the solar panel and battery are built right into the LED fixture
- No need for wiring, these fixtures do not connect to any power feed
- The easiest way to bring lighting to walls on any commercial building
- Long life battery lasts 3 nights with a one day charge
- Advanced new LiFePO4 battery lasts at least 2000 charge cycles
- Three operating modes to choose from (see detail on page 2)
- -5°F to 113°F fixture operating temp
- 32°F to 149°F battery charging temp

## ADJUSTABLE ANGLE DETAIL

### Relationship between the panel angle and latitudes:

If the latitude you are installing in is from 0° ~ 25°, the tilt angle should be placed in position 1

If the latitude is from 26° ~ 40° the tilt angle should be set to position 2 or 3

If the latitude is from 41° ~ 55° the tilt angle should be set to position 4

If the latitude is > 55° the tilt angle should be set at position 5

## OPERATING MODES

- The main light will automatically turn on at dusk and remain at 50% brightness when the motion sensor is disabled. After 5 hours or when the battery capacity is below 30%, the lamp will switch to Mode 3.
- The main light will automatically turn on to full brightness when motion is detected in the range of 24ft, it will turn off after 20 seconds when there is no motion detected. The bottom portion of the lamp will turn on automatically when the main light turns off and then turn off once motion is detected.
- The main light will turn on to full brightness when motion is detected in the range of 24ft. Once no motion is detected for 20 seconds, the lamp will turn off. The bottom portion of the lamp will not turn on in this mode.
