- ◆ **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**
- ◆ **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

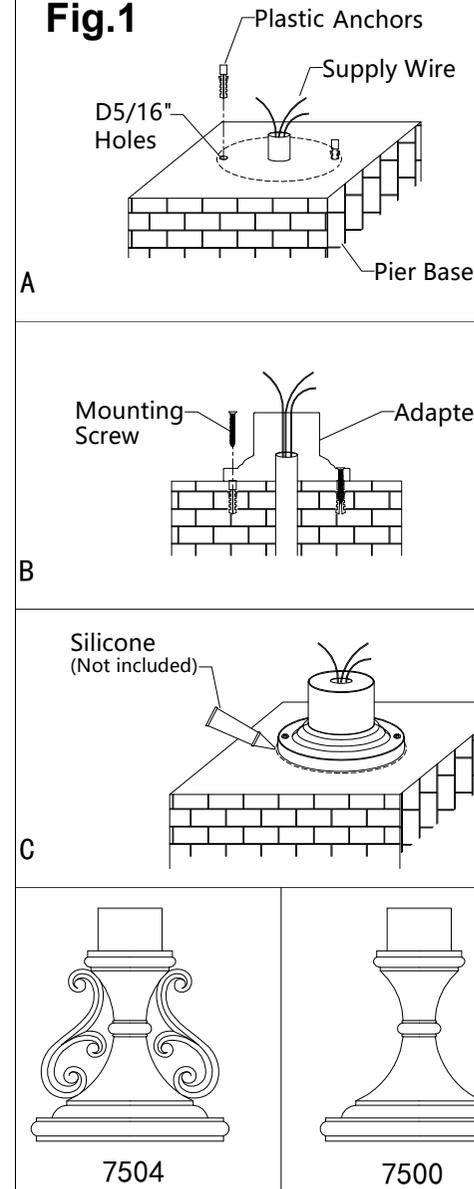

ASSEMBLING THE FIXTURE (Fig.1).

***Shut off the power at the circuit breaker and remove old fixture, including the old small hardware.**

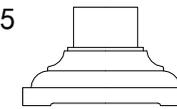

1. Carefully unpack new fixture and lay all the parts on a clear surface. Take care not to lose any small parts necessary for installation.
2. Raise the adapter on to the mounting pier base, aligning the adapter's center hole with supply wires tube, use a pencil to mark the hole located above of adapter. Note: the supply wires tube protruded height 3" of the pier base surface. Please see the Fig.1.A.
3. Note: If installation on wood pier base, use 1-1/2" mounting screws(wood screws). If installation on brick or concrete surfaces, please see the below steps.
4. Using a 5/16" masonry bit(must for position on brick or concrete surfaces) drill mounting holes 1-1/2"deep, keeping the supply wires tube between the two holes, insert plastic anchors to the drilled holes. Please see the Fig.1.A.
5. Raise supply wires through the center hole of adapter, mounting it onto the pier base surface, using mounting screws provided. Please see the Fig.1.B.
6. With silicone(Not included) caulking compound, caulk completely around where side of cover meets with the pier base surface to prevent water from seeping. Please see the Fig.1.C.

NOTE: now, you may be installing the other post lamp.
If you need connecting the wires, please refer to Fig 2.
