- ◆ **WARNING! SHUT POWER OFF AT FUSE OR CIRCUIT BREAKER.**
- ◆ **ATTENTION! COUPER LE COURANT AU FUSIBLE OU UN DISJONCTEUR.**

ASSEMBLING THE FIXTURE (Fig.1)

1. Shut off the power at the circuit breaker box. Remove old fixture and all hardware from Junction Box.
2. Carefully unpack your new fixture and lay out all the parts on a clear area. Take care not to lose any small parts necessary for installation.
3. Thread the two mounting screws into the pre-drilled holes in the Single bar spaced the same distance apart as the holes in the canopy (A).
4. Attach the Single bar to the Junction Box with the two Junction Box Screws as shown. The side of the Single bar marked "GND" must face out.
The junction box is not included.
5. While holding the canopy (A) assembly towards the ceiling, connect the electrical wires as Shown in Fig.2, making sure that all wire nuts are secured. You may have to wrap the connections with electrical tape. If your outlet has a ground wire (green or bare copper), connect the fixture ground wire to it. Otherwise connect fixture's ground wire directly to the Mounting strap with the green screw provided. After wires are connected, tuck them carefully inside the Junction Box.
6. Finish mounting the pan (A) by placing it over both mounting screws so that the screws protrude from the keyholes in the bottom of the pan (A). Rotate the pan (A) until the screw are seat in the slots of the keyholes and tighten it with a screwdriver.
7. Install the light bulbs (Not included) in accordance with the fixture's specifications. **NOTE: DO NOT EXCEED THE SPECIFIED WATTAGE!**
8. Removing the cover sheet sponge on the glass shade(B), attach the glass shade (B) into the glass frame(C), raise the assembly to the pan, aligning the top screw of frame with pan's hole, then tighten it with the finial(D).

Your installation is now complete. Return power to the junction box and test the fixture.
