Model Number:FB-SS4400SN

with suffix-S means coverplate made of nickel-plated brass
with suffix-C means coverplate made of brass

Contents and Size:

#6-32 Screws

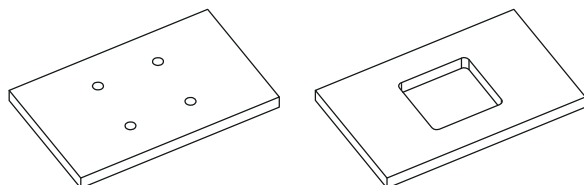

Box

Installation

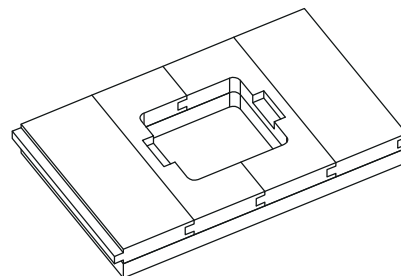

Step 1

Use the Cut-out paper to cut a space for the box to install in.

Step 2

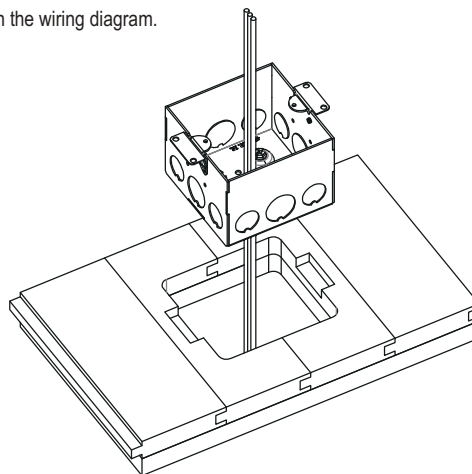

Cut the box shape without the ears completely through the sub-floor.
Cut 3/8" depth into the sub-floor for the mounting ears.

Step 3

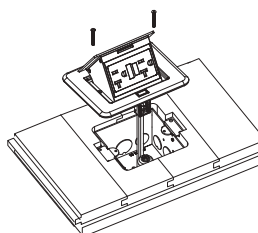

Remove knockouts and secure the box onto the floor.

Pull the wire through the opening of the floors and knockouts and connect wires based on the wiring diagram.

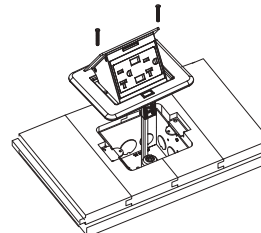

Step 4

Assemble the receptacle part above the box.

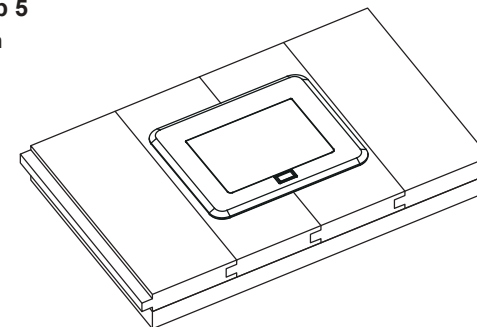

(GFCI)

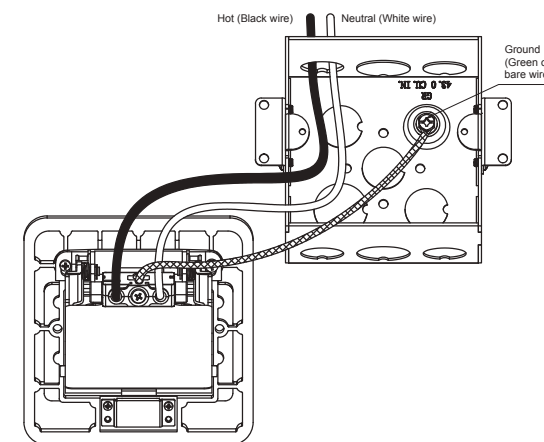

(USB)

Step 5

Finish

WIRING DIAGRAM

CAUTION-RISK OF ELECTRIC SHOCK

1. Turn off circuit breaker prior to installing the floor box.
2. Use Copper Wires only.
3. Do not exceed electrical rating of receptacle.
4. All wiring must be in accordance with all applicable National (NEC/CEC), state, and local codes.
5. 12-10 AWG stranded or solid copper wire is preferred.
6. Contact professional electrician for further installation questions.

WARRANTY

If this product fails within 1 years from the date of purchase due to a defect in material or workmanship, we will repair or exchange it, free of charge. There are no obligations or liabilities on the part of our company for consequential damage arising out of or in connection with the use or performance of this product or other indirect damages with respect to loss of property, revenue, or product, or cost of removal installation or reinstallation.
