INSTALLATION

1.

2.

3.

4.

1. Separate the power cable
2. Put the wires into the base
3. Pierce the pic into the wire
4. Twist and tighten
5. Insert the light wire through the top cap
6. Put the wire into the joint and screw the cap
7. Twist and tighten
8. Pull the wire to ensure connect well

5.

6.

7.

8.

TIPS

1.

If the power cable is too thick, you can pinch the wire with plier, then insert the pinched part into the base.

2.

When you want to replace the old connectors, cut off the previous connection and peel off enough insulation for wiring.
