

## AVENUE VIRTUAL - BY THORN

*An elegant, decorative indirect lighting lantern. Available in two sizes, the Avenue Virtual with a 70 watt MH G12 lamp and the Avenue Virtual XL with a 150 watt G12 lamp. The fixture design gives 100% indirect lighting and prevents the spread of light above the horizontal plane. Excellent performance as 95% of the light emitted from the light source is captured by the top reflector which has multiple rings that eradicates glare while controlling the light for excellent uniform illuminance.*

**CANOPY** Die-cast aluminum with a silver powder coat finish.

**TOP REFLECTOR** Pressed semi-specular aluminum with clear lacquer protection.

**CLOSURE SCREEN** Heat resistant borosilicate glass, coated with weather resistant optical lacquer for optimal transmission of light.

**BASE AND SUPPORT ARM** Die-cast aluminum with a silver powder coat finish.

**BALLAST** Core and coil ballasts Tri-Tap. Electronic ballasts also available.

**SOCKET** Bi-pin porcelain 4KV rated socket.

**MOUNTING** Slip fits a 2-3/8" tenon.

**LAMP** Included

**WATTAGES** 70 and 150 watts.

**FINISH** Standard finish is Silver. Custom colours are available
